

Improve safety with the ultimate unmanned video traffic enforcement system

The ISN Traffic Hawk Video System ensures the safety of your community

Many private communities post low speed limits, hoping that'll be enough to deter speeders. It seldom is. Most people who speed continue to speed, putting themselves and your residents at risk. But there's a way to stop dangerous driving. And it's simpler than you think. Communities who used speed cameras like ISN Traffic Hawk System report that speeding decreased dramatically.

Two types of radars

The high-resolution video Traffic Hawk system exists in two main configurations:

ISN Portable Video Radar

ISN Fixed Solar Video Radar

- Long battery life (8+ hours), external battery allows for days of operation
- Data is saved locally or can be transmitted real time over WiFi or Cellular
- Each speed event is bookmarked for easy review
- Optional GPS tracking can alert you when the unit is moved

- Stop sign mode will record a movie showing stop sign runners
- Night-time versions are available
- May generate additional revenue to your community
- Avoids unhappy confrontation between speeders and security

Traffic Hawk Management Software

Featuring a host of new capabilities that makes your community safer while you spend less time on administrative tasks.

- Filter by date, speed, plate and more
- Will search residents, members, vendors and visitor database
- Multiple images are taken for better OCR
- Shows previous violations history
- Shows location of infraction on a map
- Database is checked for previous traffic violations
- Select type of fine or warning to be issued
- Easily create, print and email violations
- Full integration with ISN software suite
