Dealer Information:

The ultra - high resolution Traffic Hawk camera coupled with speed radar sends real-time pictures of speeders and traffic violators directly to your desktop.

Recording is based on motion detection and X-Band or K/KA Band capture speeds from 15 to 200 mph.

The weatherproof Traffic Hawk unit is lightweight and portable at only 14 lbs. and takes only moments to set up.

Use your Laptop, Smartphone, Droid, IPod Touch or Tablet for aiming and remote control.

GPS, WiFi and Internet capabilities allow for location identification and will also alert you if the unit has been moved.

The Traffic Hawk has 3-4 hours of running time with the built in battery, an external battery with 48 hours running time can be added as an option.

Compatible with Win XP or 7 platforms for reviewing activity.

New fixed day & night unit available

Real Time Alert Features

Receive real time alerts of speeders right on your desktop.

The Traffic Hawk Desktop Sidebar will be available to you while you continue your regular computer work.
Set the speed limit and it will alert you if it is exceeded.

You simply click to identify the speeder and either send an officer to apprehend or send a citation by e-mail or mail.

Or switch to the **Photo History Mode** and view all violators exceeding the set speed limit or by date and time.

### Real Time GPS Tracking Feature

Your valuable unmanned Traffic Hawk will be safe from vandals or thieves – Your Traffic Hawk is equipped with GPS tracking and the Real Time Client Software will alert you if the unit is moved from its location. You are able to track the Traffic Hawk's location via GPS.

A **Notification Alert** will pop up on your desktop if the Traffic Hawk unit is moved more than 20 feet.

Real Time Weather Reports

With a click you can view weather radar at your location – with our real time weather radar function you can track any storms heading your way to help you predict road hazards within your facilities.

Playback Software Features

Traffic Hawk Client Playback Software provides video evidence of traffic infractions and undesirable activities on your property.
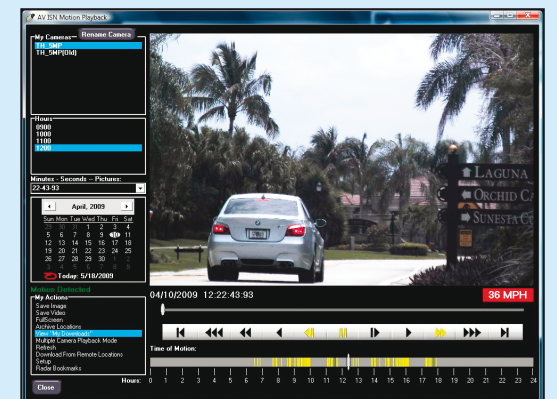

Client Playback Software synchronizes the Traffic Hawk with your computer to download video recordings of activity.

After the recordings are downloaded you can view activity in three ways:

> By Date, Hour and Minute Segments or
>
> Use Bookmarked Speeds to Filter Offenders or
>
> Click on the Red or Yellow Bars on the Time Line to view violations or motion

**Red Bars** show recorded segments with detected speed limit violations.

Yellow Bars show recorded segments with detected motion.

**With a click you can review video evidence, create a movie or e-mail the pictures.**

Pictures can be zoomed to examine and capture details, such as license tags or membership decals.

Bookmarks allow for easy review of activity

Traffic Hawk Unmanned Video Camera makes it possible for you to provide 24 hour surveillance for your community or industrial facility.

With Real Time Alert Features you are able to catch the violators in action and with **Playback Software Features** you are able to review the video by time or motion activity.

Traffic Hawk provides your community or business with security and peace of mind.
